# Similarities & Differences Native American & Latin Influences on Child Care & Early Education

The bulletin board features several sections of text and images. The top section has a yellow background with the title in cursive. Below it, there are columns of text on yellow and pink backgrounds, interspersed with small photos and illustrations. A central figure, possibly a Native American or Latin child, is highlighted in a yellow cloud-like shape. The board is decorated with colorful borders and small icons.

# Critical Thinking Through Art

Skills Develop through Art

Skills for Critical Thinking

- Creativity and Innovation
- thinking ... imagination
- with experimenting comes confidence & self-reliance
- the ability to see connections between concepts & topics and to generalize understanding between disciplines
- ability to use logic & resources
- Problem solving
- ability to built, design & why to do things a certain way.
- It expands the minds & the realm of possibilities.

Teacher Should...

- let children enjoy & give choices
- encourage their reasonings with evidence
- encourage them to question, relate & evaluate
- make children think - ask multiple choice questions
- Consistently offer & encourage students to seek alternative ways. Allow differences of opinion.
- Connect art across the curriculum

In the last decade the exposure of an average Pakistani student to art education has been limited to replication of objects drawn by their teachers on black board. This method of teaching art shares similarity with extensive focus on Rote Learning.

Don't teach them to what to think ....  
Teach them how to THINK....

## Why

Handwritten text in Urdu explaining the importance of ECE-DP. It discusses the role of early childhood education in child development, the need for quality care, and the impact of ECE-DP on children's cognitive and social skills. The text mentions 'active learning' and 'problem, critical thinker'.

Introduction of ECE in Pakistan -  
 ECE is a branch of education that focuses on the early years of a child's life. It is a holistic approach to education that aims to provide a strong foundation for a child's future learning and development. ECE is based on the principle of play and learning, which allows children to explore their world and develop their cognitive, social, and emotional skills. ECE is also based on the principle of individuality, which recognizes that each child is unique and has their own learning style and pace. ECE is a profession that requires specialized training and skills. ECE educators are responsible for creating a safe and nurturing environment for children to learn and grow. ECE is a profession that is highly valued and respected in many cultures around the world. ECE is a profession that is constantly evolving and adapting to the needs of children and society. ECE is a profession that is full of challenges and rewards. ECE is a profession that is a true calling for many people.
